EDUCATION

Temple University

Bachelor of Science in Computer Science

Aug. 2024 – May 2028

Philadelphia, PA

Relevant Coursework:

Objected-Oriented Programming, Data Structures, User Experience Design, Low-Level Systems Programming

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C/C++, HTML/CSS

Frameworks & Libraries: React, Node.js, FastAPI, JUnit, Pandas, NumPy

Tools: Git, VS Code, AWS, JetBrains IDEs, Cursor, WordPress, Codex, Claude Code, Jira, Figma, Antigravity

EXPERIENCE

Software Engineer Intern

Temple University

May 2026 – August 2026

Philadelphia, PA

- Built **CLOVER**, a **10,000+ line TypeScript** coding assistant supporting **3 AI suggestion modes**, inline code completions, and telemetry to study programmer–AI interactions.
- Engineered instrumentation and backend integrations across **8 API modules**, capturing suggestion decisions, response times, and AI-generated code from studies with **20+ participants**.
- Developed **4 GitHub Actions CI/CD workflows** that automate pull-request type checking, VS Code extension packaging, marketplace releases, and GitHub versioning.

Undergraduate Researcher

Temple University

May 2025 – Present

Philadelphia, PA

- Created experimental **AI prompting and behavioral measures** for an HCI study of programmer–LLM interactions, tracking suggestion acceptance, error detection, and trust.
- Designed and conducted usability studies, creating controlled programming tasks and analyzing **AI-generated code suggestions** to evaluate reliance and trust calibration.
- Co-authored research published at the **ACM International Computing Education Research Conference (ITiCSE)**, where the study received the **Best Paper Award**. Earned an **Honorable Mention** for **CRA Outstanding Undergraduate Researcher Award**.

LEADERSHIP

Vice President – Association for Computing Machinery (ACM)

Temple University

May 2025 – Present

Philadelphia, PA

- Organized community-building events and technical workshops for the largest CS student organization, engaging **200+** students through **5** workshops and **10+** employer talks.

Logistics Team Lead – OwlHacks (Temple University Hackathon)

Temple University

May 2025 – Present

Philadelphia, PA

- Coordinated end-to-end logistics for a **36-hour** hackathon serving **500+** students, managing **\$45K+** in sponsorships and resources, vendor coordination, and event operations.

PROJECTS

PaddleIQ | Swift, SwiftUI, watchOS, CoreMotion, Firebase

June 2026

- Developed a 48-file iOS/watchOS pickleball app featuring 60Hz, 6-axis CoreMotion capture across 5 shot categories, powered by WatchConnectivity, Firebase synchronization, and 6 unit-tested models.

ModMyCar | React, Three.js, Node.js, PostgreSQL/Supabase

June 2025

- Built a **59-file** full-stack vehicle configurator, enabling 3D vehicle previews, compatible-part selection, paint customization, and private saved build snapshots.
- Enforced vehicle-fitment and one-part-per-slot rules across API validation and an **88-line** PostgreSQL schema with RLS/triggers; verified **52** tests across geometry, API, persistence, session isolation, and database policy behavior plus a production Vite build.
